

Super Simplex E - Electronic pump controller

Adjustable pump pressure controller with dry run protection

- **1" (25mm) BSP In-Line Fitting**
- **Simple Installation**
- **Single Phase**
- **Clean Water Only**
- **Dry Run Protection**
- **Automatic Restart (15 Minute Intervals)**
- **Vertical or Horizontal Mounting**

How Does It Work?

Mac3 **Super Simplex E** is an adjustable electronic pump pressure controller. This model uses pressure and flow sensing to decide when to run the pump.

By simply using the large dial, the restart pressure of **Super Simplex E** can be adjusted as required. When **Super Simplex E** determines that the pressure had dropped below the restart pressure, the pump will be activated. Once the flow has stopped **Super Simplex E** deactivates the pump.

Super Simplex E can control a single phase pump of up to 2 Hp (1.5kW).

Super Simplex E is mounted on-pipe with a 1" (25mm) threaded male connector on the input side and a female connector on the output, allowing it to be mounted either vertically or horizontally as required. The male connector also houses a removable mesh filter.

Super Simplex E features dry run protection with a warning light on the control panel to indicate a fault .

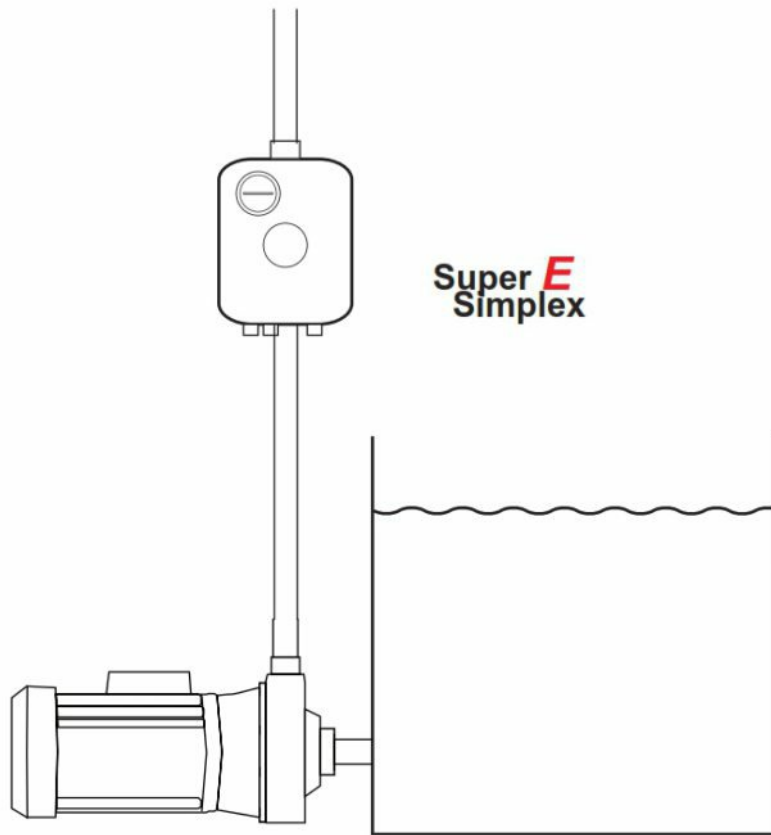

This unit is designed for use with clean water only.

Technical Specifications	
Physical	
Material	Calcium Filled Polypropylene / ABS
Weight	900g
Dimensions	250x450x155mm
Mounting	In-Line, 1" (25mm) BSP (Male in, Female out)
Working Pressure	1.5 - 8 bar
Maximum Overpressure	12 bar
Restart Pressure	0.8 - 2 bar
Minimum Differential Pressure	1.5 bar
Maximum Flow	100 lt/min
Operating Temperature	0°C – 50°C
Liquid Type	Clean Water
Ingress Protection	IP54
Electrical	
Supply Voltage	230Vac 50Hz Single Phase
Supply Voltage To Pump	1x 230Vac 50Hz Single Phase
Pump Power	1.5kW (2 Hp)
Pump Current	25(8)A
